## Officer Safety/Use of Force Workshop

Surviving the First 3 Seconds: This Officer Safety Training Course provides students with basic skills in recognizing the characteristics of an armed individual during interactions with the public. Common characteristics associated with human behavior that will enable students to more rapidly recognize, identify, and articulate the ever present dangers presented by assailants through verbal and non-verbal cues will be discussed. The goal of this training is to enhance street level interrogation skills to promote effective communication.

Hidden Weapons – Sanding your slide to avoid the splinters during the ride: This Officer Safety Training Course will identify common and uncommon concealment areas in household items, internet purchased items, altered devices and specially designed armaments all made with criminal intent to conceal dangerous weapons. This course will also give specific reminders of Officer Safety and tactical advantage procedures. Students will gain knowledge and concepts where concealed dangerous weapons can be placed within numerous items. Varieties of tools will be shown so that the students can comprehend how they are used to discover concealed weapons.

Use of Force: Myths vs. Realities: This course attempts to separate fact from fiction regarding frequently held beliefs about Use of Force. Are officers required to use minimal force? Does violating agency policy cause civil liability? Do continuums help officers make better Use of Force decisions? These questions and more will be answered based on established case law and objective research.

After the Fight Self Applied First Aid: Through Lecture demonstration and hands on activities, attendees will learn simple "ditch medicine" for treating themselves and others with little to no medical equipment while waiting for EMS.

Characteristics of Armed Individuals: This course provides the student's with basic skills in recognizing the characteristics of armed individuals during interactions with the public.

## Use of Force and Below 100

The BELOW 100 is an awareness-based, impactful course focusing on preventing line of duty deaths where officers contribute to their own death through their actions. It's been more than 65 years since the annual number of line-of-duty police deaths was fewer than 100. Law Officer's BELOW 100 initiative will change that by concentrating on areas that can most effectively save officers' lives. BELOW 100 is an awareness campaign, combined with a training program that will provide a commonsense solution to driving down a number that has remained too high for too long. BELOW 100 is not about statistics. It's about each and every officer, trainer and supervisor taking individual and collective responsibility for the decisions and actions that contribute to safety. The five basic tenants of this program, combined with strong personal commitment, will reduce line of duty deaths across America to levels not seen since the 1940's.
