

FLETC Glynco TV Service

The CIO Directorate and PMO will begin transferring FLETC Glynco TV service service providers on July 26, 2021.

What is changing?

The change will improve image quality by converting the signal from analog to digital. The channels available will decrease but include a mix of the local, network, and cable channels. Channel guide available on page 3.

Do I need to do anything?

Yes. If you have a TV in your office or building, a channel scan will need to be performed to receive the new channels. Steps for the channel scan available on page 2.

How do I know if I need to run the channel scan?

If you turn on your TV and none of the channels are working, run a channel scan.

What if I have questions or issues with FLETC Glynco Dorm TV Service?

Please contact dorm reception.

Cable TV instructions

Step 1:

Once you have turned on the television, press the **MENU** button (it may also be called **SETUP**) on your remote. You should see either a blue or black screen with commands or control icons on the television. *(If you don't have **MENU** or **SETUP** on your remote, try any similarly named button until you get an option screen.)*

Step 2:

Find the menu option (usually called **INITIAL SETUP** or **CHANNELS**) that lets you choose your television's input source; then select either **CABLE** or **CATV** input.

Step 3:

Now that you have your television configured to receive a cable signal, you now need to scan and store your channels. Select **AUTO PROGRAM**, **CHANNEL SCAN**, **AUTOSCAN**, or something similar from the same menu where you selected **CABLE**. Your screen will probably go blank or turn blue, so do not panic. It will begin cycling through all the cable channels. Usually, televisions are cable-ready for up to 125 channels, so let it scan through the channels until it finishes. *DO NOT* interrupt the scan - or else you may have to repeat this process.

This procedure stores channels into your television's memory and deletes any unused or inactive channels.

Step 4:

After the **AUTO PROGRAM** is complete, you should be able to flip through all channels with your **CHANNEL UP** and **CHANNEL DOWN** buttons.

If you need to report a TV issue, please contact the dorm reception desk.
